PROFILE

I build scalable software platforms at the intersection of architecture, technical leadership and business needs. My background spans client-side product work, backend engineering, solution design and modernization of legacy landscapes into cloud-native systems.

Alongside technical depth in C#/.NET, Azure and distributed systems, I lead teams, mentor engineers and help shape delivery organizations that can move from strategy to implementation with confidence.

EXPERIENCE

Solution Architect & Co-Founder

SEP 2025 - PRESENT

As Solution Architect and Co-Founder at Morow, I help define the technical direction of customer projects and translate business needs into scalable software solutions, combining architecture guidance, mentoring and project ownership.

MOROW

Solution Architect & Tribe Lead

MAY 2023 - AUG 2025

Designed and oversaw software systems that matched customer business and technical requirements. Coached and steered an Azure Cloud Native development team delivering end-to-end solutions.

devoteam

Lead Expert - Azure & C#.NET

JAN 2021 - APR 2023

Led project teams while designing architectures for customers on Microsoft Azure and other technologies. Part of the close leadership of the MWI team, helping shape a 75+ person organization.

delaware

Consultant to Senior Consultant

AUG 2011 - DEC 2021

Built mobile, web and backend solutions for customers across multiple industries. Evolved from client-side engineering into technical leadership, architecture ownership and large-scale Azure delivery.

EXPERTISE & BACKGROUND

Supporting information around architecture focus, technical scope, leadership, education, certifications and languages across the broader profile.

CORE EXPERTISE

Solution Architecture

Business Analysis

C# / .NET

Azure Cloud Native

Distributed Systems

AI & Automation

Enterprise Integrations

Legacy Modernization

Technical Leadership

Stakeholder Alignment

TECHNICAL FOCUS

Architecture & Solution Design

Solution architecture, business analysis, domain-driven thinking, distributed systems, event-driven architectures and legacy modernization

Backend & APIs

C#/.NET, ASP.NET Core, REST APIs, SignalR, SQL, data modeling, backend services and enterprise integrations

Frontend

Blazor, Angular, React, HTML, CSS, JavaScript, TypeScript, responsive web applications, customer portals and business applications

Cloud & Platform

Microsoft Azure, Azure Cosmos DB, MongoDB, Azure Table Storage, Azure Service Bus, containerized services and cloud-native platforms

AI & Developer Acceleration

Generative AI, LLM workflows, Codex, AI-assisted development, prompt engineering and automation

Delivery & Engineering

Azure DevOps, Git, CI/CD, observability, architecture coaching, technical leadership and end-to-end delivery

LEADERSHIP

Delivery leadership

Led delivery teams ranging from 2 to 7 developers across architecture and implementation tracks.

Coaching & capability building

Supported engineers and cloud-native teams through coaching, mentoring and technical guidance.

Strategic leadership

Part of a leadership board helping shape the direction of a 75+ person organization.

EDUCATION & CERTIFICATIONS

Bachelor in Applied Computer Science

HoGent, 2008 - 2011

Advanced Management Program

Vlerick Ghent, 2022

Azure Solution Architect

Microsoft, 2021

Advanced C#.NET

U2U Brussels, 2015

LANGUAGES

Dutch - Native

English - Fluent

French - Basic

PROJECTS

A selection of engagements spanning software architecture, technical leadership, Azure modernization and business-critical platform delivery.

DigiQS - FiDigO

SEP 2025 - PRESENT | MOROW

From Morow, co-responsible for an operational IT ecosystem for a new Belgian organization in the construction sector, combining managed IT, modern workplaces and custom software for planning and field operations.

Solution Architect - Azure & C#.NET

2024 - 2025 | DEVOTEAM

Responsible for a team of four developers building a customer portal where clients could perform salary studies and benchmarking using Machine Learning and Artificial Intelligence on Azure.

Solution Architect - Azure & C#.NET

2023 - 2024 | DEVOTEAM

Responsible for a team of six developers modernizing a legacy monolith into an asynchronous platform with containerized APIs and an event-driven architecture.

Technical Lead - Azure & C#.NET

2020 - 2023 | DELAWARE

Responsible for a team of seven developers across several projects to digitalize business processes by designing and building a full architecture with multiple integrated applications.

Technical Lead - Azure & C#.NET

2019 - 2020 | DELAWARE

Led a team of six internal developers in renewing an outdated IT landscape, combining C# delivery leadership with architecture design on Azure.

Technical Lead - Azure & C#.NET

2017 - 2019 | DELAWARE

Led a team of four developers across two major projects to build a central platform for packaging pallet orders and returns.

Senior Consultant - C#.NET

2016 - 2017 | DELAWARE

Led a team of three developers during a project to build a platform with multiple applications supporting recruiters in their daily operations.

Senior Consultant - C#.NET

2015 - 2016 | DELAWARE

Led a team of three developers building a web application for freelancers to register working hours and expenses, integrated with the accounting platform.

Consultant - Unity 3D

2014 - 2015 | DELAWARE

Developer in a Unity 3D project building a library for Lenovo, intended for internal developers creating applications for future VR/XR headsets.

Consultant - WebApps

2012 - 2014 | DELAWARE

Developed a mobile SAP CRM solution on Apple iPad. My internship project grew into a full product, giving me the opportunity to develop myself and coach several junior starters.
